PROFESSIONAL SUMMARY

Software Engineering graduate with a BSc (Hons) in Software Engineering (Second Class Upper Division). Versatile Full-Stack Developer and aspiring AI Engineer actively seeking an internship or junior role. Proven ability to architect, build, and deploy production-ready web and mobile applications using React, React Native, Java EE, Spring Boot, Node.js, and cloud/DevOps pipelines. Passionate about clean code, scalable architecture, and continuous delivery.

EDUCATION

Edgehill University (UK) – Asian Institute of Business & Science at Colombo **Colombo, Sri Lanka**
B.Sc. (Hons) in Software Engineering – Second Class Upper Division **Graduated: 2026**

Asian Institute of Business & Science at Colombo **Colombo, Sri Lanka**
BTech HND in Software Engineering **Completed**

G.C.E. Advanced Level **Completed**
Bio Science Stream

KEY PROJECTS & PORTFOLIO

SaaS Point of Sale (POS) System (Multi-tenant) **[Live Demo]**
Tech Stack: React, Spring Boot, PostgreSQL, REST APIs, Docker

- Engineered and deployed a fully functional multi-tenant SaaS POS system supporting administrative, owner, and cashier workflows with role-based access control and secure API integration.
- Implemented robust database modeling using PostgreSQL and optimized frontend state management in React.

Java EE Enterprise Web Application
Tech Stack: Java EE, Servlets, JSP, JDBC, MySQL, Apache Tomcat

- Developed a robust enterprise-grade web application using core Java EE technologies, Servlets, and JavaServer Pages (JSP).
- Implemented MVC architecture, database connection pooling via JDBC, and secure session management.

Student Management System
Tech Stack: Java, Spring Boot, OOP, MySQL, Git

- Built an enterprise-grade academic backend adhering to strict Object-Oriented Programming principles, modular service design, and relational database optimization.
- Managed source code version control and collaborative workflows via Git and GitHub.

ONGOING PROJECTS

Payroll Management System
Tech Stack: React, Spring Boot, MySQL, RESTful APIs

- Developing an automated payroll management system to streamline employee salary computation, tax deductions, and payslip generation.

React Native Mobile Application Development
Tech Stack: React Native, JavaScript, Expo, Node.js

- Building cross-platform mobile application modules featuring responsive UI components, asynchronous storage, and seamless backend API communication.

TECHNICAL SKILLS

- **Programming Languages:** Java, Java EE, JavaScript, TypeScript, Python
- **Frontend & Mobile:** React.js, React Native, Tailwind CSS, HTML5, CSS3
- **Backend & APIs:** Spring Boot, Node.js, Express.js, Servlets, JSP, RESTful APIs
- **Databases & Storage:** MySQL, PostgreSQL
- **DevOps, Cloud & Deployment:** AWS, Docker, CI/CD Pipelines, Git, GitHub, Postman
- **Core Engineering Concepts:** Object-Oriented Programming (OOP), Microservices Architecture, CRUD Application Development
